

The BILLEST-Estimating and Project Management

- One System for Estimating, Tendering, Project Management for site operations.
- Recorded 6 successful implementations
- Cost less than Rs.2million which is around 10% compared to most expensive Project Management systems.
- Ability to Start with Estimating module with cost around Rs.300,000/=
- Extra requests modules added within one working day.
- ROI within the first year itself

The current trends indicate that by the end of 2020 most leading contractor companies in the construction industry will have implemented IT systems with the goal on enhancing their business processes. Recent records show that more than 6 contractors in Sri Lanka are either in the process of implementing or have already implemented such systems.

BILLEST is especially designed to meet the needs of Project management and estimation in the construction industry.
